

# **IMPORTANT FOR FAMILIES AND STAFF TO DISCUSS WITH INDIVIDUALS WITH I/DD!**

**A solar eclipse will happen on  
Monday, August 21, 2017 in the afternoon**

## **What is a solar eclipse?**

**The moon will pass in front of the sun on Monday afternoon, starting at about 1 pm, blocking out the sun. It will be dark outside, like it is at night. By about 4:00 pm on Monday, the darkness will end outside, and it will be light outside again.**

- **DO NOT LOOK AT THE SKY DURING THE ECLIPSE - UNLESS YOU HAVE SPECIAL SUNGLASSES.**
- **IF YOU LOOK AT THE SKY DURING THE ECLIPSE, YOUR EYE SIGHT COULD BE DAMAGED PERMANENTLY!**
- **DON'T WEAR REGULAR SUNGLASSES TO WATCH THE SKY DURING THE ECLIPSE. REGULAR SUNGLASSES WILL NOT PROTECT YOUR EYES.**
